PROFILE SUMMARY

A motivated and enthusiastic fresher with a strong interest in AI and data visualization. Currently learning and developing skills in machine learning, data analysis, and visualization tools. Eager to apply knowledge in real-world projects and contribute to innovative solutions in a dynamic team environment.

PROJECTS

SKILL LINK   On-going

Developed an AI-based employment platform that personalizes job and training recommendations for job seekers. Implemented skill gap analysis to suggest targeted learning pathways, built a dashboard for real-time job market insights, and integrated skill assessments with certifications. Created an automated resume builder to generate professional resumes from user profiles. Enhanced job matching and skill development to boost user employability.

STOCK PREDICTION DASHBOARD   **GitHub Repo**   June 2024 - July 2024

As a Python Developer, I developed a dashboard analysis program using a stock market API's like Yfinance and RapidAPI. The web app basically involves in analyzing the assets and risk in the market. The chatbot mainly focuses on the answering the queries based on the stock market and also compares the real time stock price of the companies. It is GenAi integrated chatbot, which can also suggest the ideas for the investment.
